Julián Rendón

Systems Engineer

Palmira, Colombia | juldarecar2003@gmail.com | 316 3061757 | jdrc-portfolio.vercel.app | JulianRC1

Summary

Recent Systems Engineering graduate from Universidad del Valle with hands-on project experience in software development and applied artificial intelligence. Developed mobile applications and AI-powered systems involving Large Language Models, Retrieval-Augmented Generation, and NLP. Particularly interested in software engineering, AI agents, and intelligent applications. Adaptable team player with strong communication and problem-solving skills.

Education

BSc **Universidad del Valle**, Systems Engineering — Cali, Valle del Cauca — Nov 2021 – July 2026

- Built a strong foundation in software engineering, data structures, databases, and web development.
- Developed web and mobile applications through hands-on academic projects.
- Explored machine learning, large language models, and natural language processing.

Projects

Univalle Student Procedures Assistant — RAG & AI Agent System — Feb 2025 – May 2026

Undergraduate Thesis

- Developed a Python-based question-answering system for undergraduate academic and administrative procedures at Universidad del Valle.
- Built a document retrieval pipeline using FAISS and multilingual-e5-large embeddings over 37 official institutional documents.
- Integrated LangGraph agent workflows, LLM APIs, and web search capabilities to generate context-aware responses.
- Compared baseline LLM, RAG, and agent-based architectures using automated evaluation metrics.

My Notebooks - Academic Portfolio — Aug 2026

React · TypeScript · Vite

- Developed a web application using React, TypeScript, and Vite to organize and showcase academic projects and Google Colab notebooks.
- Presented projects covering Machine Learning, Deep Learning, NLP, Transformers, and Large Language Models.
- Integrated code highlighting to improve the presentation and readability of technical projects.

SASPA — Mobile Appointment Management App

Client Project · React Native · Expo · JavaScript

- Developed a mobile application prototype for a beauty and wellness business, implementing customer and administrator workflows.
- Implemented JWT authentication, REST API integration, and persistent session management using AsyncStorage.
- Developed appointment booking, service and staff browsing, availability management, and image upload functionalities.
- Designed reusable mobile interfaces using React Native, Expo Router, and NativeWind.

Experience

Camp Shohola For Boys, Camp Counselor — Greeley, PA
Summer 2025 & 2026

- Supported the supervision and daily activities of approximately 150 campers during each summer season.
- Assisted in organizing and delivering recreational, sports, programming, and group activities, contributing to daily camp operations for 9 weeks.
- Communicated daily in English with campers and 70 international staff members, facilitating group activities and cross-cultural collaboration.

Skills

Programming Languages: Python, JavaScript, TypeScript, SQL

Web & Mobile Development: React, React Native, Expo, Vite, CSS, REST APIs

Artificial Intelligence: Machine Learning, Deep Learning, NLP, LLMs, RAG, AI Agents

AI Frameworks & Tools: Langchain, Hugging Face Transformers, PEFT, FAISS

Development Tools: Git, GitHub, VS Code, Google Colab, Figma, Docker, Postman

Languages

Spanish: Native

English: B2
